

Statement of Reasons for Road Humps in the Rowlands Gill Area, Gateshead

The road humps are proposed in association with a 20mph speed limit zone for this area.

Speed assessments have been carried out within the proposed zone, which indicated vehicles were travelling at a speed in excess of a 24mph speed.

This being the case, to enable the Council to implement a proposed 20mph speed limit zone in this area in accordance with regulations, the Council is required to introduce traffic calming features within the zone and the proposed road humps are part of these measures.
